

# Mobile Laboratory Services

Pine & Swallow Environmental has been providing high-quality field analyses to our clients since 1984. With the mobile lab at your sites, you get real time analyses in the field to optimize your investigation or remedial projects. While saving you time and money on costly fixed lab analyses, we provide you with the information you need to make faster on-site decisions.

**Air • Soil Gas • Soil • Groundwater**

- **Reliability**
- **Flexibility**
- **Savings**

- Reporting limits comparable to fixed lab
- Methods based on EPA approved procedures
- Analytical programs designed to field-specific requirements
- Results can be used to guide the sampling program
- Save hundreds of dollars per day over fixed lab, without the wait

## Applications

- On site contaminant profiling
- Faster plume delineation
- Faster source identification
- Dynamic site investigations/Triad Approach
- Remedial monitoring

## Features and Advantages

- Hewlett Packard GCs with Auto Sampler
- Computerized data management
- PID, ECD and FID detectors
- Experienced technician
- Refrigerated sample storage
- Gives you rapid field decision making ability
- More data per budget dollar

## Analytical Capability

- VOC
- VPH and EPH
- SVOC
- Pesticides
- PCB
- Landfill Gases
- Flexible programs tailored to your project needs
